What is a commercial solar battery storage system?

The commercial solar battery storage system is loaded with cell modules, PCS, photovoltaic controller (MPPT) (optional), EMS management system, fire protection system, temperature control system and monitoring system. The system configuration is modular, support multi-machine parallel, plug and play, easy to install and maintenance.

What is integrated solar+ESS design?

Integrated Solar+ESS design, suitable for access of PV. New energy vehicles use PV clean electricity as priority. Off-grid operation can ensure that chargers will work even when there is power outage. On-grid/off-grid switching in milliseconds to realize noninductive shifting between utility grid and PV on wind energy storage systems.

Why should you choose a IP54 solar shell?

The IP54 waterproof shell makes it perfect to adapt to a variety of indoor or outdoor industrial and commercial application scenarios, such as photovoltaic charging stations, industrial parks, farms, etc. Integrated Solar+ESS design, suitable for access of PV. New energy vehicles use PV clean electricity as priority.
