Overview

Who is stor-energy?

Stor-Energy is a leading and specialist developer, owner and operator of large-scale battery storage systems across Australia's national electricity market. The company, CitiPower and Powercor, empowers communities by providing them with choices on how to generate, store, use, and sell energy, supporting the transition to a clean energy future.

What is UNSW doing about energy storage in Australia?

UNSW is striving towards 1,000GWh of beneficial energy storage in Australia by 2050. We believe this level of storage will underpin a healthy society by promoting a resilient and sustainable energy system. Resilience means providing electrical energy more reliably, by accommodating variable generators and unplanned damage to grid infrastructure.

Will Australia's first energy storage system be operational by 2026?

EnergyAustralia is actively pursuing the development of Australia's first four-hour utility-scale battery, the Wooreen Energy Storage System, with a capacity of 350 MW, set to be operational by 2026 in Victoria's Latrobe Valley. This project highlights the company's commitment to advancing energy storage solutions.

When will battery energy storage systems be available in Australia?

The construction of the grid was anticipated to begin in early 2022 and is expected to be in operation by 2023. Thus, upcoming projects in Australia are expected to boost the demand for battery energy storage systems (BESS) during the forecast period.
