

# **Energy storage project investment of 100 million yuan**

## Overview

---

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

What is China's new energy storage capacity?

China's new energy storage capacity has exceeded 100 million kilowatts, marking a major milestone in the nation's transition toward a new-type energy system and consolidating its global lead in renewable energy development, officials said at an energy storage sub-forum on Wednesday.

Why is China moving to a new type of energy storage?

The move is part of China's broader push toward a green, low-carbon energy transition as well as high-quality economic and social development. It builds on significant growth in the sector. As of the end of 2024, the country's installed capacity of new-type energy storage had reached 73.76 million kilowatts, according to official data.

Is new energy storage a key technology underpinning new energy systems?

He added that new energy storage, which is known for its flexible deployment, rapid response, and short construction period, has become a key technology underpinning the development of new energy and power systems.

## Energy storage project investment of 100 million yuan

---

China's New Energy Storage Capacity Surpasses 100 Million ...

Nov 13, 2025 · A Trillion-Yuan Industrial Boost Since the beginning of the 14th Five-Year Plan (2021-2025), China's investment in new energy storage projects has exceeded 200 billion ...

---

China surpasses 100 million kW in new energy storage

Nov 7, 2025 · "Since the start of the 14th Five-Year Plan period (2021-25), investment in new energy storage projects in China has exceeded 200 billion yuan (\$28 billion), driving over 1 ...

---

Ant Group leads the investment as Beijing's specialized and

May 23, 2025 · Focus on long - term energy storage of iron - chromium flow batteries and land an energy storage power station project valued at nearly one billion yuan.

---

1 billion yuan of energy storage has become a new benchmark

Sep 24, 2025 · The lithium ion and sodium ion battery PACK integrated production base project in Qingshan District, Baotou City: The project is undertaken by Inner Mongolia Qingchen Energy ...

---

The Official Website Of ZhongShan China

Jan 21, 2025 · Zhongshan Huitaitong New Energy Co's 200MW/400MWh independent energy storage power station project will settle in Shenwan Town. This is Shenwan's first 100-million ...

---

China's largest standalone battery storage project powers up

4 days ago · A 500 MW / 2,000 MWh standalone BESS in Tongliao, Inner Mongolia, has begun commercial operation following a five-month construction period, reflecting China's ...

---

Hai'an launches 100MW/200MWh energy storage project to ...

The project, which commenced construction on March 21, represents a significant investment of 500 million yuan (\$68.53 million). Once operational, it is expected to provide over 100 million ...

---

China powers up nation's largest standalone battery storage project

3 days ago · A 500 MW/2,000 MWh lithium iron phosphate battery energy storage system has entered commercial operation in Tongliao, Inner Mongolia, after five months of construction, ...

---

China unveils three-year action plan to boost new-type energy storage

Sep 12, 2025 · The country aims to achieve more than 180 million kilowatts of installed new-type energy storage capacity by 2027, which is expected to drive approximately 250 billion yuan ...

---

Huangpu subsidizes new energy storage with up to 100 mln ...

According to the Guideline to Promote New Energy Storage and Energy & Electronics Industry in Guangzhou Development District (Huangpu District) released at the ceremony, newly ...
