European energy storage solar container lithium battery sales

Overview

Is the European battery storage market ready for 2029?

Despite positive market developments, SolarPower Europe stresses that the European battery storage market needs to grow at an even faster rate to meet the rising demand for grid flexibility. A potential total volume of up to 400 GWh is projected for 2029 – an ambitious but necessary target for the energy transition.

What percentage of European battery energy storage systems are lithium ion?

By battery type, lithium-ion commanded 92% of the European battery energy storage system market share in 2024; flow batteries are projected to expand at a 16.66% CAGR through 2030.

How many battery energy storage systems were installed in Europe in 2024?

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing Europe's total battery fleet to 61.1 GWh. However, the annual growth rate slowed down to 15% in 2024, after three consecutive years of doubling newly added capacity.

Which country has the largest battery storage market in Europe?

Germany, Italy and the United Kingdom continue to lead the European battery storage market in 2025 and together account for almost 70 percent of newly installed annual capacity. Germany holds the largest market share with 27 percent, followed by Italy with 17 percent and the UK with 11 percent.
