Ex-factory price of folding containers used in oil refineries

Overview

What is a mini refinery?

The Mini-Refineries are skid mounted, modular crude oil distillation units (CDU) which process from 50,000 to 450,000 metric tons (1000 - 9,000 BPD) of crude oil per year and are capable of producing a variety of finished products including naphtha (straight run gasoline), kerosene, arctic and summer diesel and fuel oil.

What is a mini modular oil refinery?

In the midst of all the above, Standard Petroleum Company has developed small-scale oil refinery plants, which have an innovative refining unit. Mini Modular Oil Refineries are easier to operate and maintain than traditional refineries and are generally installed close to fuel consumption centers, reducing fuel chain mediation and logistics costs.

How many barrels of crude oil can a refinery store?

It also includes a truck rack facility. The on-site storage tanks vary in size, with a total capacity of 700,000 barrels, and can store crude oil, asphalt, jet fuel, kerosene, naphtha, and various other fuels and feedstocks. Used 85,000 BPD Crude Oil Refinery built in 1963.

Where can I buy a used refinery?

Phoenix Equipment has for sale used Refineries and hundreds of refinery units. Call Phoenix today to receive a quote for one of our used Refineries for sale.
