## Overview

---

Is Uruguay a good place for manufacturing in Latin America?

Uruguay has steadily emerged as a strategic location for manufacturing in Latin America. With its political stability, skilled workforce, robust infrastructure, and favorable investment climate, the country offers a compelling environment for industrial activities.

What is a D-trip circuit breaker?

Breakthrough current is the maximum current that the circuit breaker can safely stop in the event of a short circuit. D-trip circuit breakers prevent nuisance tripping, so they are best for equipment that has a high spike in current at startup, such as transformers, power supplies, and heaters.

What is a supplemental circuit breaker?

Also known as supplemental protectors, these circuit breakers mount directly to DIN rail downstream from a branch circuit breaker to protect a single piece of equipment. They are rated UL1077 for protection against overloads and short circuits. Because they are thermal- magnetic, these breakers trip two ways.

Why is Mercosur a key industry in Uruguay?

While traditional garment production still plays a role, the industry is evolving to include technical textiles and value-added fashion products. Manufacturers in this sector benefit from the country's well-trained labor force and access to MERCOSUR markets, making Uruguay a competitive base for production and export.
