

Fast charging battery inverter

Overview

What is fast charging in inverter/ups?

Fast Charging in Inverter/UPS: A Game-Changer for Power Cuts where the electricity availability is deficient. There are areas in the world like Nigeria, Yemen, Afghanistan, Syria, etc., where the power coming from the grid is unstable, and the timing for grid power availability is minimal.

What are livfast inverters & batteries?

With Livfast's range of inverters and batteries, say no more to power cuts disrupting your work and say hello to peace of mind! Our high capacity inverter series is designed with advanced Pure Sine Wave technology, enabling you to utilise your appliances noiselessly and efficiently while promoting power efficiency.

Why should you use an inverter and battery charger together?

Power any load problem-free. Efficiently charge EVs, convert voltages, or isolate shore power. Combining an inverter and battery charger in one enclosure enables many sophisticated features, such as PowerAssist and PowerControl, that are perfect for mobile, off-grid, backup and energy storage applications.

What is the difference between a battery charger and an inverter?

The inverter converts direct current (DC) from the battery into the alternating current (AC) required by the electric motor to turn the wheels. The charger performs the same task in reverse: the AC voltage is turned into DC voltage in order to charge the battery in a hybrid plug-in vehicle or an all-electric vehicle.
