

# **Financing for a 5MW Photovoltaic Energy Storage Container**

## Overview

---

What is a 5 MWh battery storage system?

The system also features a DC voltage range of 1,081.6 V to 1,497.6 V. From ESS News China-based rolling stock manufacturer CRRC has launched a 5 MWh battery storage system that uses liquid cooling for thermal management.

Can you finance a solar energy storage project?

Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project. However, there are certain additional considerations in structuring a project finance transaction for an energy storage project.

Are China-based battery energy storage systems becoming more popular?

The last 12-18 months have seen the emergence of more China-based battery energy storage system (BESS) manufacturers and system integrators on the global stage, all selling 20-foot, 5MWh container products (or higher, like CATL's 'zero-degradation' Tener).

Why do energy storage projects need project financing?

The rapid growth in the energy storage market is similarly driving demand for project financing. The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects.
