

# Finnish flow battery

## Overview

---

What is Finnish battery industries?

console.log ('footer works!'); Finnish Battery Industries is the first association in the world representing companies in the battery value chain. Our members cover the battery value chain from mining and refining to the recycling of batteries. The association is a part of the Finnish Chemical Industries.

How big is the battery industry in Finland?

The battery industry investment potential in Finland is vast. The companies have plans to make investments worth 6-9 billion euros in the next 5 years. By 2027, the companies plan to have a revenue of 9 billion euros. The number of employees is estimated to be 6 000, and indirectly as much as 20 000.

Why should you invest in a battery industry in Finland?

Finland has essential minerals which are needed in battery production. In addition to these, Finland also has a lot of renewable electricity and the skills and knowledge needed by the industry. The battery industry investment potential in Finland is vast. The companies have plans to make investments worth 6-9 billion euros in the next 5 years.

What is the Finnish Chemical Industries Association?

The association is a part of the Finnish Chemical Industries. We work to make the operational environment better for our member companies, and also to attract new investments into Finland.
