Fire-resistant Finnish collapsible container for urban lighting

Overview

What is a fire resistant container (FRC)?

Nordisk is a leading actor in the development of Fire Resistant Containers (FRC) for shipping of flammable and dangerous goods which could be lithium batteries. In the case of fire, the FRC container is able to handle over 700 degrees Celsius (1300 degrees Fahrenheit) and will suppress flames and contain an active fire for minimum 6 hours.

What is a fire proof storage container?

Our fire proof storage containers are fully tested and certified as REI 120 in accordance with the current European standard EN 13501-2 and allow you to store flammable substances close to buildings or directly on the production floor.

How hot can a FRC container handle?

In the case of fire, the FRC container is able to handle over 700 degrees Celsius (1300 degrees Fahrenheit) and will suppress flames and contain an active fire for minimum 6 hours. FRC are available for both lower deck and main deck, with different panel and door configurations to fulfill the customers needs and requirement.

Do NIOS fireproof containers pass efectis fire tests?

DENIOS fireproof containers have passed Efectis fire tests in accordance with EN 13501-2. For more than 40 years, the accredited Efectis laboratory has been a recognised body for the testing and certification of fireproof products.
