

# **Fixing solar panels on sloping roofs**

## Overview

---

Can a roofing company remove solar panels?

Removing a roof is best undertaken by a licensed and certified roofing professional. In most cases, the company that replaces your roof won't be the company that removes your panels. However, some companies offer roofing and solar panel services. Removing the panels is easy to do, but a skilled contractor should do it.

Should you replace your solar panels while repairing your roof?

Don't be discouraged though; the average American homeowner can save tens of thousands of dollars in energy savings over the life of their solar panels. While your solar panels are removed, this is the perfect time to consider taking measures to extend the life of your roof while it is being repaired.

What is a whole roof solar system?

Whole roof solar systems mean that your Solar PV panels become the fabric of your roof, serving two purposes, weather proofing and energy supply. The Solar PV panel frames are bespoke for the mounting system so there is a limited choice of panels with these set ups. Luckily there are still good quality panels to choose from.

What is solar panel roof mounting?

Solar panel roof mounting is the process of securely attaching photovoltaic panels to your home's roof structure using specialized mounting systems. This critical installation step determines both the safety and performance of your solar energy system for decades to come.
