# Funafuti solar panels connected to the grid for power generation

## Overview

---

Will 184 solar panels be positioned on Tafua pond in Funafuti?

seeing 184 solar panels positioned on Tafua Pond in Funafuti will reduce the country's reliance on diesel-powered energy generation by 47,100 litres per year. Photo: Supplied.

How much energy will Funafuti generate a year?

Through this new FSPV system 174.2 megawatts per hour of electricity will be generated each year, meeting two percent of Funafuti's annual energy demand. This innovative clean energy source will reduce the country's reliance on diesel-powered energy generation by 47,100 litres per year – a saving of approximately US\$68,000.

What is a photovoltaic system?

Photovoltaic or PV system are leading this revolution by utilizing the available power of the sun and transforming it from DC to AC power.

What are the challenges associated with solar-grid integration?

This requires more investment in building the transmission lines and often results in "line losses" as some of the energy during transportation are converted into heat and lost. Some notable challenges associated with Solar-Grid integration include problems of voltage stability, frequency stability, and overall power quality.
