

# **Guinea-Bissau solar energy storage module**

## Overview

---

Near the capital Bissau, a 30 MWp solar power plant will be built with the aim of “reducing the average cost of electricity in the country and diversifying the energy mix, while battery storage will make it possible, in the first phase, to smooth the injection curve and, in the second phase, to provide services to the electricity system”, according to the Bissau-Guinean Ministry of the Economy, Planning and Regional Integration. Does Guinea-Bissau have a solar power project?

The project will build solar plants near Bissau and install mini-grids on the Bijagós islands, thereby providing electricity to 1,200 households and SMEs. The World Bank has announced substantial financial support for Guinea-Bissau’s innovative solar power project aimed at reducing carbon emissions and increasing electricity access.

Who is funding Guinea-Bissau's first solar power plant?

The World Bank, IDA, ESMAP, and GCF are funding Guinea-Bissau’s first solar power plants with a \$78.15 million investment to support decarbonization and expand electricity access. The project will build solar plants near Bissau and install mini-grids on the Bijagós islands, thereby providing electricity to 1,200 households and SMEs.

Does Guinea-Bissau have electricity?

Currently, only 33% of Guinea-Bissau’s population has access to electricity, with the capital city of Bissau facing particularly high costs. The Solar Energy Scale-up and Access Project is expected to benefit residential, commercial, and industrial consumers nationwide — including those on the islands.

What is the solar energy scale-up & access project?

The Solar Energy Scale-up and Access Project is expected to benefit residential, commercial, and industrial consumers nationwide — including those on the islands. It aligns with the government’s strategy to encourage private sector participation, stimulate economic growth, and create

sustainable job opportunities.
