

HTC base station power management settings

Overview

How to control base stations without HTC Vive or Valve Index?

You can control the power of the base stations without HTC Vive or Valve Index by linking it to the start and end of SteamVR. SteamVR has a feature to automatically turn on the base stations when SteamVR starts and sleep them when SteamVR ends. However, this feature does not work without HTC VIVE or Valve Index.

How to control the power of SteamVR base stations?

[English | 繁體中文] A tool to manage the power of SteamVR base stations. You can control the power of the base stations without HTC Vive or Valve Index by linking it to the start and end of SteamVR. SteamVR has a feature to automatically turn on the base stations when SteamVR starts and sleep them when SteamVR ends.

What if I have problems with my power management settings?

If you're having problems with your Power Management settings, please click [Contact Steam Support](#) to get help. If you are using VR in a shared tracking space with multiple instances of SteamVR running, turn off Base Station Power Management to avoid power state conflicts. [Base Station compatibility?](#)

.

How do I update my base stations?

To update or configure your base stations, connect the wired link box that came with your headset to a USB port on your computer and then plug in the power adapter. Firmware updates and settings should then become available in the SteamVR app. If you're using VIVE Pro / VIVE Pro Eye / VIVE Pro 2, you'll also need to power on the link box.
