

# High-voltage photovoltaic container for airport use

## Overview

---

Why do airports need solar PV projects?

Solar PV projects are also a visible means to demonstrate the implementation of environmental policies. However, developing solar PV project within Airports are different from that of developing it elsewhere as it requires certain additional planning and design strategies , various studies and a multidisciplinary team of experts.

What is a mobile solar PV container?

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates.

How many photovoltaic panels will be installed at Vienna airport?

,000 photovoltaic panels this plant will be Austria's largest ground-mounted plant. After commissioning in spring 2022, the photovoltaic plants at the Vienna Airport site will generate an output of around 30 million kilowatt hours of solar power per year, and thus will cover around 30 per cent of Vienna Airport.

Why do airports need solar energy?

Solar is one of the most convenient source of renewable energy for Airports. The plain topography, presence of flat building roofs and nature of Airport operational requirements favors solar PV as compared to other sources of renewable energy. Solar PV projects are also a visible means to demonstrate the implementation of environmental policies.
