

# Home battery storage in China in Uae

## Overview

---

Why are Saudi Arabia and the United Arab Emirates using battery storage systems?

Saudi Arabia and the United Arab Emirates are taking advantage of falling prices to load up on Chinese-made battery energy storage systems, so they can boost their renewable energy ambitions. Battery storage systems are seen as crucial to integrating solar and wind energy into electrical grids.

How much does battery energy storage cost in Saudi Arabia?

While building a kilowatt-hour's worth of battery energy storage in Europe or the US costs about \$250, Rystad estimates in Saudi Arabia it is less than \$200. Chinese battery maker BYD, whose electric vehicles are popular in the region, dominates the market in Saudi Arabia.

Which country is planning the world's fifth-biggest battery storage system?

A solar facility in Neom, Saudi Arabia, which is planning the world's fifth-biggest battery storage system © Alamy Meanwhile, the UAE has launched a "gigascale" solar and battery project in Abu Dhabi, which is planned to provide baseload energy 24 hours a day.

Are battery energy storage systems a viable solution?

Battery energy storage systems (BESS) are one viable solution. An advanced technological solution, they function by storing renewable energy which can then be used when power is required. They help address the challenge of intermittent renewable energy, and provide clean power 24 hours a day, no matter the weather conditions.
