# Home solar power lighting system

## Overview

---

What is a solar powered domestic lighting system?

**Solar Powered Domestic Lighting System** The aim of this project is to design a solar-based home appliances system. Components used in this project are led light for glowing when a user requires light, a solar panel that traps the light from the sun and converts it into electrical energy.

What is a solar home lighting system?

Some of the most common applications are: Indoor Lighting – The primary application of solar home lighting systems is powering indoor lighting. The battery used in the solar lighting system can power CFL and LED lamps. A Solar lighting system with a high-capacity battery can easily light 9-watt lamps or bulbs for extended periods.

How does a solar lighting system work?

Solar lights operate by utilizing photovoltaic (PV) cells, which absorb the sun's energy and create an electrical charge within the panel. This charge travels through wires connecting the solar cell to a battery, converting and storing the energy as chemical energy for future use.

Where can solar lights be used?

Here are some examples of where solar lighting systems can be used: 1. Solar Floodlights: Utilizable during power cuts or in emergency situations, these potent solar lights can also be employed in home workshops, garages, yards, and businesses needing robust illumination or extra security. 2.

## Home solar power lighting system
