# How long does it take to install rooftop solar panels

## Overview

---

How long does it take to install solar panels?

After installation, you may need a few more days for inspection and setup. The installation of solar panels typically takes 1 to 3 days, but the entire process can take several weeks due to factors like permits and inspections. The size of the system, roof type, weather, and the installation company can all influence the installation timeline.

How long does it take to get rooftop solar panels?

If you've decided to get rooftop solar panels, be patient — it'll take a few months before you see those savings in your electric bill. Installing solar isn't as a quick-turnaround project as you might expect.

How long does it take to install solar power in Arizona?

Permitting is the most unpredictable part of the solar installation process. We've installed thousands of solar power systems in Arizona and usually move through the process quickly. But, securing all the necessary approvals and permits can take anywhere from a few weeks to a few months.

How long does a solar project take to complete?

Most projects will take 60-90 days to complete, if all goes well. Why trust EnergySage?

You've made the decision, you've signed the contract: You're getting solar panels for your house! Now what?

How soon until those rooftop panels are soaking up the sunshine, feeding clean energy to your home, and slashing your power bills?
