How many factories are there in Columbia Power Base Station

Overview

Does the Columbia Generating Station promote nuclear energy?

The Columbia Generating Station has made an enormous contribution to energy production in the Pacific Northwest. New studies indicate that favorability of nuclear energy has increased by 15% since the construction of this facility.

How much electricity does the Columbia Generating Station produce?

The Columbia Generating Station produces 1,190 gross megawatts of electricity. This accounts for 10% of all energy demands in Washington and is enough to power the entire city of Seattle.

When was the Columbia Generating Station built?

The Columbia Generating Station was first proposed in 1973 and was not constructed and operational until late 1985 to address the growing population size and energy demand in Washington. However, the construction was delayed due to costs.

Is Columbia a nuclear power plant?

Columbia Generating Station is the northwest's only commercial nuclear energy facility and is the third largest electricity generator in Washington state, behind Grand Coulee and Chief Joseph dams. Carbon-free Columbia produces millions of megawatts of carbon-free electricity each year.
