# How much does a 2MWH5g base station cost in El Salvador Communications

Overview

How much does a 5G base station cost?

Setting up a 5G base station is expensive, with costs ranging from $100,000 to $200,000 per site. This price includes hardware, installation, site rental, and maintenance. Urban areas often have higher costs due to land prices and infrastructure challenges.

How much does SA 5G cost?

However, transitioning from non-standalone (NSA) 5G to SA 5G comes with a hefty price tag—between $1 billion and $3 billion per operator. Unlike NSA 5G, which relies on existing 4G infrastructure, SA 5G requires a brand-new core network. This includes cloud-based architecture, advanced data centers, and software-defined networking.

How much does a private 5G network cost?

The cost of deploying a private 5G network for enterprises typically falls between $250,000 and $1 million, depending on the size and complexity of the installation. Unlike public networks, private 5G is customized for specific business needs, such as industrial automation, smart factories, and secure corporate communications.

How much does a base station cost?

The cost of base stations and antennas can range from $50,000 to $200,000 based on coverage needs. The number of units required will depend on the area size and the density of users. Installation costs for these components can add an additional $20,000 to $100,000. The network core is vital for managing data traffic and connections.
