Why are monocrystalline solar panels so expensive?

They are most expensive because of their quality of occupying less space, high power output and long durability. In India, monocrystalline solar panels are available in a panel efficiency range of 17%, 18% and 19%. The price of monocrystalline solar panels with 17% efficiency and a watt range of 250-above 300 W is Rs 47 per Wp.

How efficient are monocrystalline solar panels?

Monocrystalline panel efficiencies can range from 17% to 20%. Because monocrystalline solar cells are made out of a single crystal of silicon, electrons can flow easier through the cell, which makes the PV cell efficiency higher than other types of solar panels.
