

# How much does a solar lamp cost for home use

## Overview

---

How much does a solar light cost?

These lights reside off the main power grid and can be installed in remote locations. Because of the advanced technology required for solar lights, they are more expensive, averaging about \$3000 per light. That includes the light fixture, the solar panel, controller, pole, and the smaller components that make up the light.

How much do solar street lights cost?

When comparing the total costs of traditional and solar lighting, there appears to be a clear winner. Overall, solar street lights cost around \$4,800 over 5 years, while standard costs a steep \$8,800 because of trenching and installation costs. As before, this is the cost of one street light.

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.

How much do solar panels cost?

Global solar panel pricing varies wildly. Manufacturing locations dramatically affect final costs. China produces the world's cheapest solar panels at \$0.13-\$0.18/watt. Vietnam and Malaysia follow at \$0.18-\$0.22/watt. US/EU panels cost \$0.30-\$0.50/watt. Key Insight: Cheapest doesn't mean lowest quality.
