How much does it cost to add a battery and an inverter

Overview

How much does it cost to add a battery to solar?

Check with your installer or utility to see what's available when you add a battery to solar. [How Much Does It Cost To Add a Battery to a Solar System?](#)

The cost to add a battery to an existing solar system usually ranges from \$10,000 to \$30,000 for a fully installed residential setup.

Should I add a battery to my solar inverter?

If you already have a hybrid inverter, such as the SolarEdge Energy Hub, adding a battery is usually easier. Hybrid inverters are designed to work with DC-coupled batteries, which can offer better efficiency because energy flows directly from the solar panels to the battery without extra conversions. Many string inverters last around 10-15 years.

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

Should you add a solar battery to your home?

If you live in an area with severe weather or an unstable grid, adding a solar battery gives you reliable backup power and can help you save money by shifting your solar energy to evening hours. With over a decade of experience in the solar industry, GreenLancer helps homeowners keep their systems running safely and efficiently.
