

# **Huawei Brazil Energy Storage Products**

## Overview

---

Does Huawei have its own data centers in Brazil?

Huawei began offering cloud services in Brazil in 2016, initially using the structure of phone carrier Vivo. Huawei has two data centers in the city of São Paulo and has expansion plans for 2022. However, Huawei is also a client of companies that build data centers in the country.

How will Bess support Brazil's energy transition?

The landmark bond issuance, the first of its kind in Brazil dedicated solely to BESS, will go a long way to supporting the country's energy transition by enhancing grid reliability, optimising renewable energy use, and further reducing the dependence on fossil fuels.

How many MWh of battery will Huawei install in 2025?

"Initially, we planned to install 224 MWh in batteries by 2025, as reflected in the green bond issuance. However, due to growing demand from both current and potential clients, we have signed a Memorandum of Understanding (MoU) with Huawei to triple this capacity to approximately 750 MWh by 2027."

## Huawei Brazil Energy Storage Products
