# Huawei Hungary Pecs Power Grid Energy Storage Project

## Overview

---

Where is the largest battery energy storage system in Hungary?

Image: MET Group. IPP MET Group has put a 40M/80MWh BESS in Hungary into commercial operation, deployed using technology from Huawei. The 2-hour battery energy storage system (BESS) is the largest in Hungary, Switzerland-headquartered MET Group said, deployed at its Dunamenti thermal power plant in Százhalombatta, near Budapest.

Will Hungary's new battery energy storage system help Green the grid?

The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

How will a new solar power plant help Hungary's power grid?

The new facility supports a growing push to green Hungary's power grid, especially as solar capacity surges. With no moving parts and a rapid response time, batteries like this are designed to stabilize the grid by storing excess solar power and releasing it when demand peaks.

How met group contributes to the energy transition in Hungary?

On site at the Dunamenti Power Station in Százhalombatta, MET already installed a 4 MW / 8 MWh demonstrator plant based on Tesla Megapack 2 batteries in 2022. With this latest BESS plant which went into operation today, MET Group and the Dunamenti Power Station are further strengthening their contribution to the energy transition in Hungary.

## Huawei Hungary Pecs Power Grid Energy Storage Project

---

MET Group celebrates BESS milestone in Hungary

Jun 24, 2025 · MET Group has inaugurated Hungary's largest standalone battery energy storage system (BESS), marking a major milestone in the country's energy transition. Located at the ...
