

# **Huawei Myanmar Phase Change Energy Storage Products**

## Overview

---

What is a phase change thermal energy storage system (PCM)?

In phase change thermal energy storage technology, PCMs play a crucial role in determining the performance of the energy storage system. Researching and finding safe, reliable, high energy density, and high-performance PCMs is key to the advancement of phase change thermal energy storage technology.

What is a phase change material (PCM)?

Phase Change Material (PCM): A substance capable of storing and releasing thermal energy during a phase transition, typically from solid to liquid and vice versa. Thermal Energy Storage (TES): The capture of heat energy for use at a later time, often through latent or sensible heat methods.

Who makes fusionsolar products in Myanmar?

Global Star Co. Ltd., a subsidiary of Dagon Group, and United Amara Bank (UAB) have partnered with Chinese ICT giant Huawei to distribute its FusionSolar line of products in Myanmar. Huawei and Global Star, which is owned by junta crony U Win Aung, unveiled their partnership in Yangon on Feb. 23.

Which materials store energy based on a phase change?

Materials with phase changes effectively store energy. Solar energy is used for air-conditioning and cooking, among other things. Latent energy storage is dependent on the storage medium's phase transition. Acetate of metal or nonmetal, melting point 150–500°C, is used as a storage medium.

## Huawei Myanmar Phase Change Energy Storage Products
