Induction lighting solar lights

Overview

What is solar induction lighting?

Solar Induction lighting luminaires offer many features which make it an ideal alternative technology to HID for lighting large spaces such as auto lots, parking lots, hangar ramps, streets, roadways and walkways. **MORE SOLAR LIGHTING Buy Direct and Save \$\$\$** – All of our lighting fixtures ship factory direct to your facility.

Are solar induction lights a good choice?

As part of a complete stand alone, off grid operation, solar Induction lights are an excellent choice for new construction or retrofit applications. The 24 Volt DC driver solar compatible induction lighting fixtures replaces existing HID fixtures up to 250W.

What is induction lighting?

Induction lighting uses a special type of fluorescent bulb. Induction lights use a magnetic field generator to electrically excite the phosphorus coating on the inside of a glass tube. This type of lamp offers several financial and environmental benefits over traditional electric fluorescent bulbs.
