

# Industrial Energy Storage in Asia

## Overview

---

Will India see a demand for energy storage systems in Asia-Pacific?

The JV intends to offer the solution to ReNew, with 150 MWh BESS required for its 300 MW peak power project in Karnataka. Therefore, based on the above mentioned factors, India is expected to witness significant demand for energy storage systems market in Asia-Pacific region.

What is India's energy storage capacity?

The country has a pumped storage capacity of 4.8 GW (end of 2021). Hydropower accounts for 12% of India's total capacity, with 51.4 GW. Thus, new initiatives and projects are expected to drive the energy storage systems market.

What is a battery energy storage system?

Battery Energy Storage Systems (BESS) are highly versatile, with applications ranging from short-to-medium-term utility-scale grid support to behind-the-meter commercial and industrial installations. Additionally, other technologies like thermal storage and flow batteries are gaining attention as viable options for longer-duration storage.

What is energy storage system (ESS)?

Energy Storage System (ESS) is a device or group of devices assembled to convert the electrical energy from power systems and store energy to supply electrical energy at a later time when needed. An ESS helps to effectively use and manage electrical energy and also expects the benefit of a stable electricity supply and cost reduction.
