What is a commercial solar inverter?

The commercial inverter from KOSTAL supports a system voltage of up to 1100 volts DC. In this way, the solar inverter for the commercial sector ensures reliable and constant energy yields, meaning that the rated output of the company's solar system is quickly reached and the output power continues to be utilised perfectly.

Are inverters necessary for a rooftop solar system?

Inverters are incredibly important pieces of equipment in a rooftop solar system. There are three options available: string inverters, microinverters, and power optimizers. Did you know?

With the “One Big Beautiful Bill” signed into law, the 30% tax credit for residential solar is going away at the end of 2025.
