

# Install solar panels for the factory

## Overview

---

Can solar panels be installed on a factory roof?

The roofs of factories are often the ideal place to install solar panels. As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it.

Can solar panels be used in warehouses and factories?

Warehouses and factories require large amounts of open space for storage and operations, which can limit the available space for solar panels. However, with creative design and installation solutions, solar panels can be integrated into existing structures and spaces to maximize energy production.

How much space do industrial solar panels need?

Depending on the efficiency of the panels, 4-5 acres of open land or 10,000+ sq. ft. of rooftop space are typically required. Q2: Is net metering available for industrial solar?

.

Can you install an on-grid Solar System on a factory or warehouse roof?

At First Solution Group, we specialize in providing on-grid solar systems for businesses looking to reduce their energy costs and carbon footprint. In this article, we will outline the steps we take to help you install an on-grid solar system on your factory or warehouse roof.
