

# **Intelligent Photovoltaic Folding Container for Railway Stations**

## Overview

---

What is a solarfold photovoltaic container?

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation in a very short time.

What is a mobile photovoltaic system?

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container technology.

Can PV systems be installed in high-grade railway stations?

In order to study the feasibility of installing PV systems in railway stations, this paper analyzes the PV potential and techno-economic characteristics of China's high-grade railroad stations by combining a three-dimensional digital earth system (LSV) and PV plant calculation methods.

How photovoltaics are used in railway stations?

According to the installed photovoltaic area, the installed capacity and annual power generation of photovoltaics deployed in major railway stations are obtained. The energy consumption of each railway station is obtained according to the building area of the station building.
