

Inverter 58kw

Overview

Which central inverters are best for large PV power plants?

Central inverters from FIMER FIMER PVS980-58 central inverters are ideal for large PV power plants. The high DC input voltage, high efficiency, proven components, compact and modular design and a host of life cycle services ensure FIMER PVS980-58 central inverters provide a.

What is a pvs980-58 inverter?

The PVS980-58 inverter is one of the most efficient and cost-effective ways of converting the direct current (DC) generated by solar modules into high quality and CO₂-free alternating current (AC) that can be fed into the power distribution network.

What is a Fimer central inverter?

Central inverter PVS980-58 The new high power FIMER central inverter raises the performance, cost efficiency and ease of installation to new levels. The inverters are aimed at system integrators and end users who require high-performance solar inverters for large photovoltaic (PV) power plants and are optimized for m.

What is a pvs980-58 Fimer central inverter?

Leading inverter platform Like other FIMER central inverters, the PVS980-58 has been developed on the basis of decades of experience in the industry and proven technology platform. Unrivalled expertise from the world's market and technology leader in frequency converters is the hallmark of
