# **Is Ottawa's energy storage power station worth investing in**

## Overview

---

Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

Is battery energy storage the best way to meet Ontario's growing electricity demand?

Battery energy storage is the most affordable, lowest-emission path to meeting Ontario's growing electricity demand and delivering a reliable power supply in rural Ottawa, and it can get the job done with a laser focus on safety, concludes a new analysis by Dunsby Energy + Climate released Thursday.

Who approves energy storage systems in Ontario?

The primary authority for the Installation and Approval of Energy Storage Systems connected to the electrical grid in Ontario is the Electrical Safety Authority (ESA). The ESA administers Part VIII of the Electricity Act and oversees the Ontario Electrical Safety Code (OESC).

When did energy storage start in Canada?

The first energy storage project in Canada, the Sir Adam Beck Pump Generating Station, came online in 1957. However, the next project did not come online until 2013. There are three main types of energy storage currently commercially available in Canada:
