Is there a NAS with its own uninterruptible power supply

Overview

Should I buy an ups or a NAS?

Note: If your data is important to you, an UPS is the cheapest security blanket you can buy. It ensures that consistent power is delivered to your NAS and, in the event of a power outage, it can allow you to safely power down your NAS and not risk damage long-term.

What is the best uninterruptable power supply for a NAS?

The CyberPower CP1500PFCLCD is one of the best uninterruptable power supplies to buy for a home office with a NAS. You'll be able to take advantage of the 1500 VA battery pack to power the NAS for a good while before needing to shut it down.

Can a ups connect to a NAS with a data connection?

By connecting the UPS to a NAS with a data connection, the UPS can tell the NAS how much battery is left and have it safely shut down. It's not just a NAS the UPS can provide power for. Anything with a compatible cable will be able to connect to and draw from the device.

Does Synology NAS need an ups?

An UPS could be the ideal solution that allows you to stay online in case of a power failure. If you run a web server on your Synology NAS with an online website on it, an UPS is a must-have. It doesn't matter what you think, you can't predict when the power goes out.
