Does Poland have a solar PV market?

IEO's latest report for the solar PV market of Poland shows a slight decline in annual installations in 2024. (Photo Credit: TaiyangNews) Poland's solar PV market expanded by 637 MW in Q1 2025 to a cumulative of 21.9 GW, according to the latest statistics published by the Institute for Renewable Energy (IEO).

How much solar power does Poland have?

By 2020, the country had installed over 4,000 MW of solar capacity, with the number doubling by 2023. The 20,000 MW milestone achieved in October 2024 represents a significant acceleration in Poland's solar energy expansion.

How to optimize solar generation in Warsaw Poland?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Warsaw, Poland as follows: In Summer, set the angle of your panels to 35° facing South. In Autumn, tilt panels to 54° facing South for maximum generation.

Does Poland have a Solar Energy Curtailment problem?

The association reflects on the growing and regular use of curtailment for the PV industry in Poland, whose scale and frequency now pose a real operational challenge. Its estimates suggest that from January 2025 to mid-June 2025, the country's transmission system operator curtailed close to 600 GWh of solar energy generation.
