Italian power grid solar container battery

Overview

Why is a grid-scale battery energy storage system important in Italy?

As the penetration of solar power increases, grid stability has become a critical issue. In response, Italy is prioritizing the development of grid-scale battery energy storage systems (BESS Italy) alongside new industrial and commercial energy storage projects.

Does Italy have a new battery energy storage system?

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

Is Italy a leader in industrial energy storage and commercial energy storage?

Accordingly, there is a growing market for industrial energy storage and commercial energy storage projects, positioning Italy as a leader in advanced Italy storage solutions and renewable energy Italy initiatives.

What will Italy get from a battery storage tender?

Winning participants of the tender will receive fixed revenues over a 15-year contract for capacity made available to the grid. Italy broke new ground in energy storage with its very first battery storage auction, competitively awarding the full 10 gigawatt hours (GWh) of capacity put up for tender.
