

# **Italy will subsidize electricity prices for 5G base stations**

## Overview

---

What is the Italian 5G plan?

The Italy 5G Plan, with an allocation of EUR 2.02 billion aims to incentivise the deployment of 5G mobile networks in areas of market failure. The Italian Strategy for Ultra Broadband 2023-2026 was approved by the Interministerial Committee for Digital Transition (CITD) on 6 July 2023.

When will 5G be available in Italy?

Iliad was the fourth Italian mobile operator to launch 5G in December 2020, now available in areas across numerous cities. As 5G gains traction, operators are looking to switch off their 3G networks and repurpose the existing spectrum from 3G services to 4G and 5G services.

Will Italy phase out the single national price (pun) by 2025?

In alignment with the European Commission's directive for greater integration of the European internal market, Italy has been instructed to phase out the Single National Price (PUN) by 2025, as outlined in Article 20 of Regulation 2019/943 of June 5, 2019, on the Internal Electricity Market (IEM).

How do zonal prices affect electricity prices in Italy?

The zonal prices will divide the country into seven electricity market regions and establish specific prices for each of them. Consequently, consumers in different regions may experience variations in electricity costs (Picture 1).
