# Jakarta Communication 5g small base station

## Overview

---

What is new Indonesia technical standard for 5G devices?

This regulation regarding new Indonesia technical standard for 5G devices applies to subscribers and base station devices used for Broadband Wireless Access (BWA). New Indonesia technical standard for 5G devices are part of efforts to modernize the regulatory structure to support the deployment of next-generation networks.

What is new Indonesia technical standard for 5G BWA?

New Indonesia technical standard for 5G devices are part of efforts to modernize the regulatory structure to support the deployment of next-generation networks. The regulation of the new Indonesia technical standard for 5G BWA is, of course, inseparable from efforts to harmonize with international norms.

Where is Telkomsel launching 4G & 5G mobile services in Indonesia?

Indonesian telco Telkomsel has deployed 49 base stations to support 4G and 5G mobile services in the country's new capital city, Nusantara which is set to open on August 17, located on the island of Borneo, 800 miles away from the current capital Jakarta on the island of Java.

What is a 5G subscriber station?

Subscriber Stations (SS): A radio access device on the user side, such as a 5G modem or router. Base Station (BS): Is a network core device that transmits 5G signals to the surrounding area. Before it can be legally used or marketed, the device must meet some established technical requirements. Here are some of the standards that must be met:
