Overview

What is the Fengning pumped storage power station?

The Fengning Pumped Storage Power Station, the world's largest facility of its kind, has commenced full operations with the commissioning of its final variable-speed unit on December 31.

Can pumped storage stations be used as energy storage support?

With China continuously scaling up the construction of integrated clean energy bases like "hydro-wind-storage" and new energy bases such as "Shagohuang", pumped storage stations, especially variable-speed ones, will be more widely applied as energy storage support in regional grids (China Power, 2023).

What is the largest grid-forming energy storage station in China?

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide.

How many pumped storage stations are there?

Out of the 38 pumped storage stations already in operation, these two enterprises own 33 of them, accounting for a combined capacity of up to 93 %.
