Lisbon Valley Electric Energy Storage Project

Overview

What does Portugal's energy storage tender mean for the energy transition?

Portugal's government has announced the outcome of an energy storage tender that will see the installation of 500 MW of energy storage capacity to support the country's energy transition. Energy storage battery. Photo by Anna Vasileva.

Which countries have a new energy storage incentive program?

Spain recently launched a €700 million energy storage incentive program, while Portugal announced an additional €400 million investment last week aimed at boosting grid stability and BESS deployment.

Which solar-plus-storage projects are available for public consultation?

The projects listed for public feedback on the government's consultation portal include two solar-plus-storage sites. Two solar-plus-storage projects are among five planned renewable energy sites whose details have been published for public consultation on the Portuguese Environment Agency's Participa portal.

How many MW of energy storage will be added to the grid?

The successful projects will together add at least 500 MW of energy storage to the public electricity grid. The call for proposals, which is part of the country's Recovery and Resilience Plan (RRP), was launched last summer. The list of approved projects can be seen in the statement by the environment and energy ministry of energy.
