

# **Lithium Energy Storage Power Supply in Chiang Mai Thailand**

## Overview

---

Does Thailand need a battery energy storage system?

Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, but this may see the country struggle to fulfil carbon neutrality and Net Zero commitments over the coming decades.

Why is Thailand a key player in the lithium-ion battery market?

As the global shift toward clean energy accelerates, Thailand is emerging as a key player in the lithium-ion battery market, driven by its strategic position in Southeast Asia's electric vehicle (EV) and renewable energy boom.

Who is Thai storage battery?

Overview: Thai Storage Battery is one of the oldest battery manufacturers in Thailand, known for its strong presence in the automotive and industrial sectors. TSB is transitioning into lithium-ion but remains a key player in traditional batteries. Established Time: 2023.

Why is battery storage a problem in Thailand?

This is partly due to a lack of clarity on how battery storage fits into existing electricity infrastructure. In 2022, the Thai government approved 24 BESS projects, all of which were located alongside solar operations. Their total combined storage capacity was 994 MW.
