# Lithium power station factory in Ireland

## Overview

---

Which battery energy storage systems are available in Ireland?

The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The South Wall Battery Energy Storage System went live in 2023 and has the capability of providing 30MW of fast-acting energy storage.

What will ESB's new battery plant do for Ireland?

ESB has today opened its latest major battery plant at its Aghada site in Co Cork which will add 150MW (300MWh) of fast-acting energy storage to help provide grid stability and deliver more renewable power onto Ireland's electricity system.

Why is the lithium industry important in Ireland?

The lithium industry in Ireland presents several key considerations for interested parties. First, the regulatory environment is crucial, as the Irish government actively promotes sustainable mining practices and adheres to stringent environmental laws. Understanding these regulations is essential to ensure compliance and avoid legal challenges.

How many MW of battery storage capacity are there in Ireland?

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery projects, as well as additional renewable enabling technologies.
