

# Lithuania 2025 Energy Storage Subsidy

## Overview

---

How will Lithuania support energy storage projects?

Image: Energy Cells via LinkedIn. Lithuania can move ahead with a scheme to provide €180 million (US\$200 million) in grants to energy storage projects after it was approved by the EU. The programme will provide direct grants for the construction of the projects, with a target to support at least 1.2GWh of energy storage projects.

Will EU grant a battery storage project in Lithuania?

Can Lithuania achieve 100% renewable electricity by 2050?

In support of the 100% renewable electricity target by 2050, the government is encouraged to design a long-term renewable energy strategy for Lithuania, which would analyse the electrification of end-uses, notably heat, and an assessment of system integration needs across sectors.

Does Lithuania need a new energy system?

Lithuania imports a large share of its electricity needs, while bioenergy is taking the lead in domestic energy supply. By 2030, Lithuania wants to reduce its electricity imports by half and produce 70% of its electricity needs from domestic sources. It plans to complete its synchronisation with the continental European power system by early 2025.
