

# **London Vanadium Flow Battery 2025**

## Overview

---

Will 'multiple' vanadium flow battery bids be lodged in LDEs tender?

Investor and renewables developer Frontier Power Ltd has said it is planning to lodge 'multiple' vanadium flow battery (VFB)-related bids in a long-duration energy storage (LDES) tender expected before July.

What is a vanadium flow battery?

Vanadium flow batteries, like Invinity's VS3 technology, offer a compelling alternative. These systems provide long-duration storage, have no risk of fire, lower degradation over time, and are better suited to daily heavy cycling without loss of capacity.

Are vanadium flow batteries a viable alternative to lithium-ion batteries?

However, lithium-ion systems face challenges in providing multi-hour to multi-day storage, are prone to thermal runaway risks, and often suffer reduced lifespans under heavy cycling. Vanadium flow batteries, like Invinity's VS3 technology, offer a compelling alternative.

Will invinity deploy a 20.7mwh redox flow battery in the UK?

Invinity has been given the green light to deploy a 20.7MWh vanadium redox flow battery system in the UK, the largest in the country.
