Main breaker switch for sale in Sydney

Overview

Who offers Clipsal circuit breakers & main switches 6KA?

At AGM Electrical Supplies, we offer Clipsal Circuit Breakers & Main Switches 6kA that are trusted by contractors, electricians, and builders all across Australia. Whether you are working on a residential job, industrial site, or commercial project, AGM Electrical Supplies offers you the quality and safety you deserve.

What is the difference between a main switch and a circuit breaker?

A main switch (or isolator) is designed purely to switch power on and off manually—it does not provide overcurrent protection. A circuit breaker automatically trips during overload or fault conditions to protect circuits. Main switches are used for isolation during maintenance and servicing, allowing electricians to safely de-energise circuits.

What is a Clipsal circuit breaker & main switch?

These Clipsal Circuit Breakers & Main Switches are designed with a 6kA breaking capacity. This protects your electronics and the Clipsal Circuit Breakers & Main Switches against short circuits, power surges, and overcurrent. We offer top-of-the-line Clipsal circuit breakers that can safely interrupt fault currents of up to 6000 Amperes.

What is a circuit breaker used for?

A circuit breaker automatically trips during overload or fault conditions to protect circuits. Main switches are used for isolation during maintenance and servicing, allowing electricians to safely de-energise circuits. Circuit breakers protect against electrical faults but aren't designed for frequent switching operations.
