Marseille 6w solar panel power generation

Overview

What is solar power generation in France?

This graph provides an annual and monthly overview of solar power generation in France. The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a renewable and low-carbon energy. In 2022, solar power generation rose sharply on the back of expanded capacity and good sunlight.

Why is solar photovoltaic generation important in 2022?

The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a renewable and low-carbon energy. In 2022, solar power generation rose sharply on the back of expanded capacity and good sunlight. Data from RTE meters and distribution network operators.

Why did solar photovoltaic generation increase in 2024?

In 2024, solar photovoltaic generation increased as a result of the gradual development of generation capacity, despite relatively unfavourable sunshine conditions throughout the year. Find all the analyses on photovoltaic generation in the 2024 Electricity Review. The graph gives an annual and monthly overview of the solar park in France.
