

Marshall Islands Electric Power Station Generator

Overview

How much energy does the Marshall Islands need?

Primary Energy. The Marshall Islands relies on imported petroleum to meet 99% of its primary energy needs. In 2016, 1,928 terajoules of petroleum products were imported, of which 65% were used for national energy needs and 35% for international fuel bunkering.

Where are Marshalls Energy's Solar panels located?

The Marshalls Energy Co.'s solar panels are on school and government building rooftops. Photo courtesy of Marshall Islands Energy Co. In order to stabilize power service, the Marshalls Energy Co. was forced to import more than half-a-dozen rental containerized generators last year that currently provide the backbone of Majuro's power.

Who imports petroleum in the Marshall Islands?

Petroleum is imported by the state-owned Marshalls Energy Company (MEC) and private companies. MEC is responsible for on-grid and off-grid electricity generation, transmission, and distribution throughout the Marshall Islands except for Ebeye.

Why does Majuro need a new power system?

In order to stabilize power service, the Marshalls Energy Co. was forced to import more than half-a-dozen rental containerized generators last year that currently provide the backbone of Majuro's power. International donors and the Marshall Islands government have lined up to fund a huge overhaul of the power system for Majuro.
