

# **Maximum discharge current of energy storage cabinet battery**

## Overview

---

What is a maximum continuous discharge current?

**Maximum Continuous Discharge Current** – The maximum current at which the battery can be discharged continuously. This limit is usually defined by the battery manufacturer in order to prevent excessive discharge rates that would damage the battery or reduce its capacity.

How long can a battery be discharged?

**Maximum 30-sec Discharge Pulse Current** –The maximum current at which the battery can be discharged for pulses of up to 30 seconds. This limit is usually defined by the battery manufacturer in order to prevent excessive discharge rates that would damage the battery or reduce its capacity.

What is maximum continuous battery discharge power?

**Maximum continuous battery discharge power** is the maximum discharge power of the battery, which can be continuously applied at the battery terminals.

What is maximum battery discharge power at full state?

**Maximum battery discharge power at full state** is the maximum allowed discharge power of the battery starting at SOC = 100%.

## Maximum discharge current of energy storage cabinet battery
