

# **Mobile outdoor base station solar power generation system description**

## Overview

---

Do cellular mobile towers need a generator?

There is a clear challenge to provide reliable cellular mobile service at remote locations where a reliable power supply is not available. So, the existing Mobile towers or Base Transceiver Station (BTSs) uses a conventional diesel generator with backup battery banks.

Can solar and wind provide reliable power supply in remote areas?

Solar and wind are available freely and thus appears to be a promising technology to provide reliable power supply in the remote areas and telecom industry of Ethiopia. The project aims to generate and provide cost effective electric power to meet the BTS electric load requirement.

What is an off-grid power system?

are off-grid power systems. An off-grid system does not have a connection to the main grid electricity and vary widely in size and application . generators. In addition, it includes power electronics and electricity storage bank. Some of the productivity and fight climate change [16–19].

What is a community based electrical system?

Standalone community based electrical system thought to be the most acceptable solution in order to eliminate poverty and enhance financial businesses .
