

Mombasa Energy Storage Project in Kenya

Overview

How can the port of Mombasa transition to green energy?

Technical support for a feasibility study to identify viable green energy solutions at the Port of Mombasa lays a major foundation for such a transition. This project shall create new job opportunities around green technologies and renewable energies and associated value chain resulting in increased income levels and poverty reduction.

Will Mombasa be the largest liquefied petroleum gas facility in East Africa?

This partnership aims to establish a vast liquefied petroleum gas (LPG) storage and handling facility in Mombasa, positioning it to be the largest of its kind in East Africa. The joint venture is expected to materialize with the cooperation of the state-owned Kenya Pipeline Co., which will pair up with Asharami Synergy Plc.

How big will Kenya's LPG storage facility be?

According to insiders familiar with the ongoing discussions, the planned facility will boast a substantial capacity of 30,000 tons. This development is poised to fortify Kenya's LPG storage infrastructure significantly.

How is Kenya transforming its energy sector?

Kenya's energy sector is on the verge of undergoing a substantial transformation, with LNG import terminal, cross-border transmission system for NG supply, and new power plant.
